

Call For Participants

self-esteem, social media
usage and social anxiety

7 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Canterbury Christ Church University

The foundation of this study is influenced by the idea that self esteem is everything, especially in social media. It is important for researchers and people to understand how individuals particularly young people view themselves in social settings. Examine how them subjectively evaluating themselves emotionally can play a major role in their social media usage and social interaction. To explore this, you will be asked to complete questions with reference to two scales Social Interaction Anxiety
