Potential Differences in Blame
Attributions Between LPR and
MPR

30 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Coventry University

This study is a semi-replication of a study conducted by Adolfsson et al. (2017) into the differences in blame attribution between lone perpetrator rape (LPR) and multiple perpetrator rape (MPR). LPR is when there is only one perpetrator who has committed the offence, whereas multiple perpetrator rape (MPR) is when 3 or more perpetrators have committed rape against a single victim. **NEED MORE MALE PARTICIPANTS!**
