Characterising and Measuring Bodily Awareness and Emotional Awareness

75 min(s) to complete

£10 cash

Experiment & Questionnaire

Kings College London, 18-20
Newcomen St, London SE1 1UL,
UK

King's College London

This study investigates if bodily awareness (such as being aware of your own heart rate) relates to emotional awareness. We are also investigating if impairment in bodily awareness is related to social difficulties and communication abilities. We will ask you to complete some language tasks, body awareness tasks involving heart rate monitoring, a vocabulary task, a reasoning task, and some questionnaires.
