Healthy Immune Monitoring Protocol

15 min(s) to complete

Sincere Gratitude

Experiment

University of Washington

This study is designed to observe how healthy immune cells in the blood behave when grown outside body and in the presence of certain drugs. These patterns of responses give us an idea how the immune system might be functioning inside the body and will ultimately help our understanding of cancer and related blood disorders in patients with disease.

William H. Foege Hall, 3720 15th Ave NE, Seattle, WA 98105, USA
