

Call For Participants

How much calcium do we need to change our appetite hormones?

16 hour(s) to complete

£50 cash

Experiment

University Of Bath, Claverton
Down Rd, Combe Down, Bath BA1
7AU, UK

University of Bath

The study will involve 4 trials with each lasting roughly 4 hours. During each trial participants will drink a protein and calcium drink before having frequent blood samples and lunch. The calcium content of the drink will change each trial. We will be measuring blood sugar, insulin and appetite hormone responses to these drinks
