Weight Loss - Improving
Motivation Using 3D Body
Scanning

3 month(s) to complete

Sincere Gratitude and an
opportunity to access technology
which may help you for free

Questionnaires plus 3D body
scans

Castle Cavendish Works, Dorking
Rd, Nottingham NG7 5PN, UK

Body Aspect

The study will measure the impact of 3D body scans on motivation to lose weight .Participants with a BMI of 30+ URGENTLY needed to have 2 X 3D body scan,3 months apart. Participants view their 3D scan and it is rotated 360 degrees. They also and complete a questionnaire . After scan 2, participants see both scans rotated alongside each other, so they can clearly see any progress in change in shape and size. A 3D scan shows body shape and size much more accurately than a 1D mirror or photo.
