

Call For Participants

Voice recording session for
speech studies

180 min(s) to complete

Cash payment of £10 per hour

Recording

2 Wakefield St, London WC1N
1PF, UK

University College London

Noisy environments, such as busy cafes or restaurants, can affect our ability to understand speech. Previous research has shown that we are better at understanding familiar voices than unfamiliar ones, especially in these noisy environments. Our research group is examining whether training on different types of novel voices can induce this familiarity effect in a short time span. To perform this study, we require a large amount of voice recordings. You will be asked to help us create vocal stimuli
