Study on the impact of short conversations on social anxiety and depression

4 week(s) to complete

Sincere Gratitude

Experiment

Online

University of Toronto

Researchers affiliated with ykz.com are conducting a study into the effects of regular, short audio conversations on feelings of social anxiety and depression. To participate in this study, you must be an English speaking (or ESL) adult over the age of 18. The study will last four weeks. Results will be made public to all participants. All interactions will occur online.
