

# Call For Participants

60 GBP What brain processes enable medium/psychic like experience?

80 min(s) to complete

60 pounds

Experiment - Two questionnaires:  
two computer based perception  
tasks, EEG recording.

Dreadnought Building, London  
SE10 9NN, UK

University of Greenwich

Study takes place at the Greenwich  
University.

If you have experienced extrasensory  
perception (had some level of  
medium/psychic like experience) please  
sign up for this study. This study is exploring  
what brain processes allow for extrasensory  
perception to take place. It appears that  
psychics, mediums and individuals  
experiencing extrasensory perception have  
different perception compared to the general  
population. But this has not been  
investigated directly.
