Experiment - Two questionnaires two computer based perception tasks, EEG recording.

Dreadnought Building, London SE10 9NN, UK

University of Greenwich

Study takes place at the Greenwich University.

If you have experienced clairaudience (had experienced communication with spirits via hearing) please sign up for this study. This study is exploring what brain processes allow for clairaudience to take place. It appears that psychics, mediums and individuals experiencing clairaudience have different perception compared to the general population. But this has not been investigated directly.
