

# Call For Participants

MEG study: How does your brain see and imagine scenes?

3 hour(s) to complete

Cash of £10 to £50 depending on the experiment you take part in.

2 experiments with brain Scans

12 Queen Square, Holborn,  
London WC1B 5JS, UK

University College London

We are looking for volunteers aged 18-35 to take part in experiments investigating how we visually imagine different types of information. You will be asked to vividly imagine in your mind different objects to make a scene, as well as view different kinds of images, whilst we scan your brain using MEG (magnetoencephalography). This is a type of brain scan that measures what your brain is doing in a passive way – it is non-invasive and completely safe. Sessions are during the day on...
