Views towards technologies
used to edit genes during
pregnancy

10 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Surrey

The purpose of this study is to gain a greater understanding of people's attitudes towards genetic diseases and gene-editing technologies during pregnancy. More specifically, this study focuses on a hypothetical scenario of expecting a baby with a rare genetic blood disorder which cannot be cured.

To take part in this study, it is essential that you are aged between 18 and 35, and are NOT currently expecting a baby.
