Coping Mechanisms and Resilience within the LGBTQIA+ population

15 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

Coventry University

This study will investigate coping mechanisms and resilience and stress levels within the LGBTQIA+ population using an online questionnaire that takes no more than 10-20 minutes.

The study aims to fill a research gap to explore coping mechanisms and to investigate how these are used, alongside resilience, in everyday life- it is important to understand how LGBTQIA+ individuals cope with additional stressors such as adversity.
