## The CRiB2 Study

25 week(s) to complete

You will be given £60 for your study participation, accounting for £20 per study...

Randomized Controlled Trial

King's College London, De Crespigny Park, London SE5 8AF, Vereinigtes Königreich

King's College London

Many people with bipolar disorder experience difficulties with their memory, concentration or their ability to make decisions and solve problems. These problems may make some everyday tasks or working difficult. Cognitive remediation is a psychological therapy which has been shown to help people improve their thinking skills. We are studying a computerised version of cognitive remediation, which focuses on linking the training of thinking skills to many real-world situations and problems.
