

Call For Participants

The effect of chokeberry
(*Aronia melanocarpa*)
polyphenols on blood pressure

3 month(s) to complete

£150 cash

Clinical Study

Stamford St, London SE1, UK

King's College London

This study primarily aims to investigate the effect of aronia berries (chokeberries) on vascular function. This dietary intervention is a randomized placebo controlled trial (RCT) where consumption of 2 different capsules, containing aronia berries extract or a placebo, will be investigated.
