Contraception for women over 40

45 min(s) to complete

Sincere Gratitude

Interview

Online

University of Bristol

Women over 40 use contraception for many reasons; to avoid pregnancy, manage perimenopausal symptoms, or treat conditions like endometriosis. However, most online information is aimed at a younger audience.

We want to interview women aged 40-55 to find out their views and experience of using contraception and get their feedback on a new section of the Contraception Choices website we are currently developing.
