Clinical Trial

London, UK

University of Exeter

Do you want to stop drinking alcohol?

If you are ready to stop drinking or have already done so, you may be eligible to take part in the KARE trial.

This study looks at the effects of giving a low dose intravenous injection through the vein (Intravenous infusion) of the drug ketamine or saline solution (which is the placebo) over 40 mins once a week for three weeks alongside seven sessions of a talking
