

Call For Participants

The influence of
transcutaneous nerve
stimulation on acute pain
perception

120 min(s) to complete

Cash + refund reasonable travel
expenses

Experiment

New Radcliffe House, Walton St,
Oxford OX2 6BW, UK

King's College London

We are looking for participants aged 18–50 years with 1) a diagnosis of ASD and/or 2) alexithymia to take part in a study on pain perception. This study uses electrical stimulation to investigate the influence of individual traits on pain perception and will take place at Department of Experimental Psychology, University of Oxford.

If you are unsure if you are alexithymic or not, please complete the online survey.
