

Call For Participants

£45 fMRI and TMS study
looking at the brain's function
in imagery!

5 hour(s) to complete

£45 Cash

Experiment

2 Wakefield St, Kings Cross,
London WC1N 1PJ, UK

University College London

This is a combined functional magnetic resonance imaging (fMRI) and transcranial magnetic stimulation (TMS) study in which you will be asked to perform button-pressing tasks inside the scanner (first session), and perform a linguistic task while undergoing TMS (second session). We are interested in how the brain makes use of imagery during basic tasks. You will receive £45 for your participation, as well as copy of your brain scan! The task takes place on two separate days.
