

Call For Participants

Dopamine release during epileptic seizures

7 hour(s) to complete

Cash via bank transfer

Brain scan and questionnaires

South Bank, London SE1 7EH, UK

King's College London

We are inviting HEALTHY MEN between 30-50 years of age to participate, as healthy controls, in a study of neurotransmitter (dopamine) release in people with epilepsy.

For comparison, we recruit healthy volunteers.

The study involves one simultaneous PET-MR scanning session in three parts over the course of a *Monday* afternoon, at the King's College London & Guy's and St Thomas' PET Centre at St Thomas'
