

Call For Participants

Hallucinatory experience,
Migraine, and Out of body
experience

2 hour(s) to complete

Cash £20

Behavioural experiment with
Electroencephalography (EEG)
measurement

52 Pritchatts Rd, Birmingham
B15 2SA, UK

University of Birmingham

This experiment investigates visual factors that may well be related to the predisposition to certain forms of visual hallucinations, distortions and aberrations on people with migraine (with/without aura). You will be required to complete some basic questionnaires and take part in a computer-based experiment. EEG will be recorded by an EEG cap placing on your head.
