Online Experiment

Online

Arden University

We are recruiting healthy individuals & those with MILD ME/CFS.

The aim is to investigate how food impacts your performance on 2 short cognitive tests, a colour naming task and a memory task. Participants will be allocated to either a food or no food group & will take the 2 cognitive tasks online before & after either your evening meal or a 30 minute break with no food. The study takes place between 5pm & 8pm.
