Analysis of UML Software Architectures

60 min(s) to complete

Prize draw

Experiment

Online

The Open University

This study is about analysing UML diagrams. It has been prepared to collect data for a PhD research project being undertaken with the Open University. The project focuses on the risk assessment of software architectures. This questionnaire is concerned with determining whether the way an architecture is split into different diagrams helps/hinders finding errors or assessing changes to the architecture. Each participant will be entered into a prize draw for Amazon.co.uk vouchers.
