Music, language and emotion
processing in autism, amusia
and TD

6 hour(s) to complete

Cash

Experiment

Reading, UK

University of Reading

We study how music, language and emotion are processed by individuals with or without autism or amusia (tone deafness), using behavioural and EEG methods.

Participants will take part in a series of experiments over three years, each of which will last about 1 to 2 hours, involving listening to or producing some speech or musical sounds and/or performing some cognitive tasks.

You will be paid £7.50 per hour, plus travel
