Location-based audio exploration
and interview

33 Seely Rd, Nottingham,
Nottinghamshire NG7, UK

University of Nottingham

This is a short exploration of a location-based audio system. You will be lent a smartphone and headset which will play music and other sounds as you move through a large, open room. There are eleven different sounds in total. You can move around the space however you like and listen for as long as you like. We ask that you try to find all eleven sounds. After you finish, there will be a short interview, lasting no more than 10 minutes.
