We are looking for males and females aged 18-45 to take part in a study looking at the effect of rapamycin (an immunosuppressant) on the neurochemistry of learning and memory related to eating chocolate. The study involves coming in on three separate occasions and completing an online food diary in the week before and after.

Compensation: £60 for completing 3 in-lab sessions and a daily food diary, plus £10 for completing an online follow up questionnaire
