

Call For Participants

Public perceptions of recent developments in genetic testing

2 hour(s) to complete

£15 shopping voucher

Focus Group

Birmingham B15 2TT, UK

University of Birmingham

As genetic technologies develop at a rapid pace, more and more individuals have access to information about their genetic make up and their risk of developing diseases in the future. This focus group study of public perceptions of recent developments in genetic testing study will help us to understand social and ethical issues related to these developments, and will help to inform future policy in this area. Focus group participants will receive £15 high street shopping vouchers.
