

Call For Participants

Transcranial Current Stimulation (tCS) and Memory in Older Adults

3 hour(s) to complete

Cash (£40)

Experiment

Birmingham B15 2TT, UK

University of Birmingham

We are looking to recruit healthy older adults (aged 55-75) for a study at UoB investigating how a brain stimulation technique (tCS) affects performance on a memory task. Participants will be asked to complete several computer-based memory tasks whilst experiencing stimulation.

The experiment consists of two sessions (approx. 90 minutes each) which must be spaced at least one week apart.

Compensation will be £40 total for both sessions.

Please email for further information.
