

UFC

Acute and chronic resveratrol supplementation and gut health

4 day(s) to complete

£140/£160 (brain blood flow
subsample)

Experiment

Newcastle upon Tyne NE1 8PA,
UK

Northumbria University

Overweight and obese participants aged
35-60 needed for a study assessing the
effects of resveratrol supplementation on
cognition and gut health.

This study involves a training visit (approx.
3 hours), 2 testing visits three months apart
(approx. 7.5 hours each) and a 5 min
appointment midway through. Visits take
place on weekdays at the Brain,
Performance and Nutrition Research Centre
at Northumbria University (City Campus).
