Personality, Learning, and
Emotion Recognition (online
study)

60 min(s) to complete

Prize Draw £20 voucher (5
available)

Online Questionnaire and Online
Experiment

Online

University of Nottingham

This study is interested in how personality affects learning. The first part of the study is several questionnaires of your personality, your motivations, your friendships, etc. The second part is three experimental games that assess learning: a shape game, an arcade style game of chance, and an emotion recognition task.

The entire study will last about an hour
(between 50-65 in a pilot study).

You will be entered into a prize draw to win
