App-based study, online
questionnaire

Online

Deakin University

This study investigates the link between engaging in fat talk (negative comments made about your own body/appearance when interacting socially) and body dissatisfaction levels.

To achieve this, the study involves two parts: Part 1) an online questionnaire that takes 15-20 minutes to complete, and Part 2) six mini-questionnaires per day for seven days, which take only 1-2 minutes each to complete.
