

Call For Participants

Understanding sex differences
in behaviour: The FemNAT-CD
study

6 hour(s) to complete

Cash or shopping vouchers

Experiment

Birmingham, UK

University of Birmingham

We are looking for participants to study similarities and differences between boys and girls in brain structure and function, hormone levels, genetics, emotion recognition and physiological activity. We will also be conducting interviews with the participants and their parents to ask about the child's health and typical behaviours, and trying to understand the impact of environmental factors on well-being.
