

Call For Participants

Simultaneous Bilingual Experiences and Executive Functioning

25 min(s) to complete

Sincere Gratitude

Online Questionnaire and 3 short
online tests looking at memory,
task switching and inhibition

Online

University of Reading

I am looking for bilingual adults aged 40-65 years to participate in a study investigating if there is a difference in some mental processes depending on bilingual experience. Volunteers need to have learnt both languages at the same time from early childhood.

The study will involve a questionnaire and 3 short online tests.

If you have any questions or would like more information, please email me on the email address provided.
