

# Call For Participants

Interview study: Internet use  
by people with early onset  
dementia & carers

90 min(s) to complete

Sincere Gratitude

Interview

Online

University of Nottingham

This project is being conducted to see how people who have a diagnosis with Young Onset Dementia are using the internet, and how they, and their families, are using it to find information about their diagnosis, and services and support available. It also looks to find out if people have planned for what happens to their online profiles and data in the future, for example social media profiles, emails, or online bill payments and banking.
