BioPac Lab Study on Decision Making

45 min(s) to complete

Prize draw £50

Experiment

Bath BA2 7AY, UK

University of Bath

This is a psychology experiment involving a card-sorting task, which aims to better understand how members of the public make decisions when presented with tasks.

This study involves answering some questions on a computer and a simple card-sorting task. Alongside this, we will measure physiological information using BioPac equipment (heart rate and skin conductance).

The study will take around 45mins.
