Experiment

Canterbury CT2 7ND, UK

University of Kent

We want to observe how parents and young children interact when working on problem-solving tasks and how this develops as children grow up. We are looking for children and parents to visit us once a year for the next three years to take part in this important and exciting research project. You and your child will work together to complete some puzzles. These interactions will be video-recorded so that we can later code them. You will both also complete some simple questionnaires.
