Online Questionnaire, In-person
interview (London) or Skype

Online

The Open University

The aim of the study is to assess whether a difference in education has an influence on decision-making power amongst married women in the UK. This is part of my final economics module at the OU, where I have to undertake a small research project. This will include a 2 minute online questionnaire, and a 15 minute interview. I would greatly appreciate any participants to take part.
