Tobacco and E-cigarette Use in Youth with Autism

20 min(s) to complete

Prize draw

Online Questionnaire

Online

Florida Institute of Technology

The purpose of this 2-part survey is to better understand beliefs and intentions of children with autism towards tobacco use in the United States Findings from the survey will be used to expand and improve interventions aimed at decreasing tobacco use/use of e-cigarettes in high risk populations. You are encouraged to participate if your child has ASD, is between the ages of 10 and 17, and if your child has a reading comprehension equivalent to 5th grade. The survey should take 20 - 30 minutes.
