Moral Competence and Moral Stress in UK Employment Practice

30 min(s) to complete

Option to be entered into a prize draw to win £100

Online Questionnaire

Online

University of Huddersfield

The purpose of this study is to explore moral development.

The main aim of this study is to assess the effects of higher education on an individual's moral development, more specifically whether education governs individual enhancement, which may be evident within job practice.

Furthermore it will explore the occurrence of moral stress occurring in businesses, personality and emotional intelligence and their relationship to moral competence.
