Attention to drug names
within a prescribing system

20 min(s) to complete

Sincere Gratitude

Experiment

Online

Robert Gordon University

I am conducting research on attention to drug names within an electronic prescribing system by healthcare professionals. The main aim of the study is to investigate factors that can impact on attention and therefore the ease of identifying drug names on a prescribing system. The experiment will be conducted using an online website and should take no longer than 15-20 minutes to complete. I am looking for 60-100 participants for this study.
