## The interoceptive attention questionnaire: IATS reliability

15 min(s) to complete

Prize Draw £50 Amazon voucher

Online Questionnaire

Online

Royal Holloway University of London

The aim of this project is to develop a novel measure of self-reported interoceptive attention (the IATS). Before this novel tool can be used for research purposes, it is essential to establish how reliable the measure is over time. Therefore, the aim of the current study is to establish the test-retest reliability of the IATS.

If you agree to take part you will be asked to complete one 10 minute questionnaire and 28 days later complete one 5 minute questionnaire.
