

Call For Participants

Effects of tDCS on executive
and social processing related
to autism traits

60 min(s) to complete

£16 Cash

Experiment

Claverton Down, Bath BA2 7AY,
Regno Unito

University of Bath

Looking to super charge your brain for better
focus and attention to detail?

Transcranial Direct Current Stimulation has
been implicated in the improvement of
cognitive abilities. We are recruiting for
participants with and without autism.

If you take part, we will ask you to complete
two questionnaires and two different testing
sessions 1 week apart, with each session
lasting approximately 60 minutes. Each of
these sessions will involve two different
computer tasks.
