The effects of intervention duration on emotion appraisals during pregnancy

3 month(s) to complete

£10 shopping voucher

Online Questionnaire, intervention study, interview

Online

University of Nottingham

The current study will require participants to complete a series of online questionnaires, as well as take part in a self-paced online intervention, during the second trimester of their pregnancy. The opportunity to take part in a follow-up interview is also provided, where you can discuss how effective you felt the given intervention was.
