MyQoL - Tracking Quality of Life using a Smartphone Application

14 day(s) to complete

Sincere Gratitude

Questionnaires sent to your mobile phone

Online

University of Cambridge

We developed a mobile application for real-time assessment of Health-Related Quality of Life (HRQoL). We know from previous research that tracking HRQoL during the course of treatment is linked to improved patient experience. We want to make these assessments more feasible by implementing them in a mobile app. Before we can try this idea in healthcare settings, we need to make sure that our application works and collects useful information. To do this we need volunteers to try our app!
