Eclipse Study

6 month(s) to complete

Cash

Experiment

Derby Rd, Nottingham NG7 2UH,
UK

University of Nottingham

We are testing whether carnitine (a dietary supplement) reduces the liver fat and improves metabolism in individuals who have a high concentration of fat within their liver. Participants will be given either Carnitine or a placebo, together with a meal replacement milkshake twice daily for 6 months.

More detailed information can be obtained from researchers
