Personality and Vulnerability to Cyber Attack

10 min(s) to complete

£5 - either by link to amazon voucher or bank transfer (participant decides)

Online Questionnaire / experiment

Online

University of Southampton

How can we prevent criminals and other malign actors from using what they know about people to manipulate them to gain access to their computer networks? How much do you know about yourself? This study explores individual characteristics - such as personality - against key cyber-security questions, in order to support our understanding of how we can better protect internet users.
