

# Call For Participants

Moral Disengagement and individual differences in cannabis use

20 min(s) to complete

Sincere Gratitude

Online Questionnaire

Online

University of Nottingham

The study investigates cannabis use in adults and the cognitive mechanisms behind this, along with individual differences; it will explore how minimal manipulation might affect these mechanisms and attitudes. The study should take approximately 20 minutes to complete.

If you are an adult (18 or older), and use cannabis currently or have used it within the last 5 years, I would like to invite you to take part in this study. You can access it by following the link provided.
