TestRoots WatchDog: An IDE Plugin to Assess Developer Testing

5 min(s) to complete

Prize draw: An Android tablet, noise-cancellation headphones, and a mechanical keyboard

Field Study

Online

Delft University of Technology

This study is aimed at professional and Open-Source Software (OSS) developers who wish to gain insight into their daily working practices in the IDE. WatchDog is a plugin for the Eclipse and IntelliJ IDEs that observes how you test. It gives you helpful statistics on your testing behavior and it respects your privacy (and your company's policy).
