## Supporting Eating Disorder Recovery in Young People - Email Interview

60 min(s) to complete

Sincere Gratitude

Interview

Online

Nottingham Trent University

The study aims to investigate social identity, social networks and eating disorder recovery amongst young people aged 16-25. The semi- structured email interview will explore the experiences of young people who seek out support for their eating disorder online, to understand and improve established mechanisms of social support for adolescents living with eating disorders. The recovery experience will also be explored, to consider both illness and recovery identities.
