

Call For Participants

How does cannabis affect
brain activity?

16 hour(s) to complete

£200 with travel covered

Pharmacological MRI Experiment

Ariel Way, Shepherd's Bush,
London W12 7GF, UK

University College London

We are conducting a brain imaging study investigating the short-term effects of cannabis (with Covid-safe procedures). We are looking for people aged 16-17 & 26-29. We want people who sometimes use cannabis, not daily users. You will get paid about £200 and return taxis are arranged.

There are 3 in-person sessions, over a 4-8 weeks, held at Hammersmith Hospital. You receive vaporised cannabis, do an MRI scan and a series of questionnaires.
